ABOUT ME

I am an enthusiastic, hard working and committed person, with a passion for technology, designing interfaces and understanding user needs. I have achieved during my studies and professional experience, many positive feedback from my colleagues and teachers. I am eager to learn more and be challenged through the tasks I am provided with, and make the best out of every developing project I have, learning and expanding my knowledge day by day. I consider myself to be an adaptable individual, with an eye for detail.

INTERPERSONAL SKILLS

Presenting	Dependability
Strategic thinking	Working in a team
Communication	Project management

TECHNICAL SKILLS

HTML/CSS	PHP
Full-stack Javascript	UI/UX
Reporting skills	Web Development

LANGUAGES

Romanian (native)	English (fluency level)	German (medium level)
-------------------	-------------------------	-----------------------

EDUCATION

Information Technology Engineer/ Bachelor, ICT

2022 - 2026

Fontys University of Applied Sciences, Eindhoven, The Netherlands

During my studies at Fontys UAS, I will have graduated with a Bachelor in Engineering. The major I chose to do is ICT&Media. Some more information about the major I am following:

- Courses in programming (front and back-end) – learned HTML&CSS, full-stack JavaScript (and frameworks – Node.js, React);
- Handling APIs ;
- UI/UX design – frameworks (DOT, Double Diamond, working in sprints);
- Media Production and Development (working with industry tools, such as the Adobe Suite or DaVinci programs).

UI/UX Design Course/ Certificate
Wantsome – The friendly IT academy

October 2019 – March 2020

High School Diploma/Baccalaureate

2017–2021

"Grigore Moisil" Computer Science Highschool, Iași, Romania

WORK EXPERIENCE

Web content Manager

Pink Ponki, Iași, Romania

June 2018 – August 2018

- Modifying and taking care of a child's clothing store website;
- Working with Wordpress;
- During the time I worked here, I learned what its like to work in a proffesional environement and it was my first contact with learning how to properly handle tasks.
- Page of the shop: <https://www.uniformecopii.ro/>;

CoderDojo Mentor

Optymyze, Iași, Romania

January 2019 – June 2020

- Working with children over the age of 12 and teaching them the basics of programming;
- Helping anyone who needed guidance or got stuck on a specific task;
- Supervising during breaks and engage the participants in fun activities;

Volunteer

"DevExperience" International IT conference, Iași, Romania

April 2019

- Participating in the volunteer meetings prior to the event;
- Organising and taking care of the place where the conference took place;
- Promoting the event on social media;
- Actively participating in both of the event days.

Director of External Affairs

LSRS – The Netherlands

July 2022 – present

- Contacting sponsors on behalf of future events and making partnerships;
- Keeping in contact with the embassy;
- Organising and managing a team.

PROJECTS

Website for an upcoming artist

March 2022 – June 2022

As part of my first year, semester 2 project, I had to develop, together with a team of 3, a website page for a real client, a young artist based in The Netherlands. I was assigned the role of team leader, meaning that I had to coordinate the process and make sure every deadline was respected.

What I learned:

- To manage a small team;
- Ensure the good development of a product – started from scratch, doing user research on the case, and then applying that knowledge into the coded website prototype;
- Communicate with stakeholders;
- Understand tasks and respect deadlines;

Technologies used:

- *HTML&CSS;*
- *JavaScript;*
- *jQuery;*

Ingrediento Food app – personal project

September 2022

I wanted to expand my programming knowledge, and I started working, together with a friend, on developing a web application using an API. The idea behind it, is that each user has an input field where they introduce what ingredients they want to use, and then they get recipes with those ingredients. The project is still under development and improvement.

Technologies used:

- *HTML&CSS;*
- *JavaScript;*
- *jQuery;*
- *API*
- *PHP*
